Matthew Okechukwu, Department Chemical Engineering as Associate Professor of Chemical Engineering with effect from October 1, 2012.

ALABADAN DELIVERS 25TH INAUGURAL LECTURE

. . . Advocates Proper Food Storage For Food Security

Prof. Babatope Albert Alabadan of the Department of Agricultural Engineering said food storage using efficient and effective storage structure made from affordable materials can ensure food availability, accessibility, stability and utilization.

He made this assertion while delivering the 25th Inaugural lecture of the Federal University of Technology, Minna, titled *“Housing and Food Security: Now and in the Future – Lessons From the Termites”*, held at the First Bank Lecture Hall, School of Agriculture and Agricultural Technology (SAAT), Main Campus, Gidan Kwano on Thursday, January 31, 2013.

According to him, Food losses which affect food quality and safety, economic development and the environment represent a significant cost to the world economy and inability to feed the world.

“The food insecurity in the world is making more than 800 million people including 300 million children go to bed hungry everyday and more than 40 percent of Africans do not have the ability to obtain sufficient food in a daily basis”, he stated.

The Professor of Agricultural Engineering in his lecture stressed that to successfully deal

with the present and future food security needs, there is need to learn a lesson from the termites and called on the Federal Government of Nigeria to build one tone capacity silos for each identify small-scale farmer groups to reduce losses and increase local supplies.

He further explained that weather conditions which depend on the geographical location are the most important factors affecting farm produce storage but that they can be stored at higher moisture contents with less deterioration at locations having lower temperature. And called on government to take advantage of this and encourage the long-term storage of farm produce in areas where deterioration is likely to be minimal. He also called for public sector investments in agricultural research and infrastructure to increase sector productivity.

Prof. Alabadan delivering his lecture.

In his remark, the Vice-Chancellor, Prof. Musbau Adewumi Akanji, *FNSBMS*, who chaired the occasion, said the 25th Inaugural Lecture is the first to be presided by him as the Vice-Chancellor of this great University and a typical example of town meeting gown.

Prof. Akanji who appreciated the audience, commended the lecturer for his efforts and noted that the University did not make a mistake in making him a professor. He also stressed the need of keeping to time so as to bring back the culture of the University.

A cocktail party was hosted in honour of the Lecturer and his invited guests by the University.

FUT, MINNA CHRISTIAN COMMUNITY PLEDGES SUPPORT TO VC

Federal University of Technology, Minna Christian Community (comprising of both Pentecostal and Catholic) has pledged support to the newly appointed Vice-Chancellor of the institution, Prof. Musbau Adewumi Akanji, *FNSBMB*.

The group stated this recently when they paid a courtesy call on the Vice-Chancellor at the Council Chambers, Main Campus, Gidan Kwano.

The Chairman of the group, Mr. Kolo Mathew assured the Vice-Chancellor of the group support, commitment and loyalty to his leadership while also soliciting for the

VC support towards ensuring a peaceful co-existence among various faiths on campus.

“We pray God will give you the grace to lead this University in the next five years” he stated.

The Catholic Chaplain, Rev. Fr. Nelson Gabriel Onli assured the Vice-Chancellor of the group spiritual support and also prayed that God should give him the necessary grace to pilot the affairs of the University.

Also speaking, Pastor, Eli Alasan urged the VC to operate an open door policy and to enhance staff welfare in the University.

In his response, Prof. Akanji thanked the Christian Community for finding him worthy to be in their midst and promised them of Management’s support while urging them to add to the beauty of the campus by building a befitting worship centre in Gidan Kwano.

The VC also asked the group to always include him in their prayers in order for him to succeed.

“Your presence here today gives me assurance that I am in the midst of friends and I hope this friendship will grow from strength to strength”, Prof. Akanji stated.

PCRC SEEKS VC’S SUPPORT

The Police Communication Relations Committee (Bosso Community) has solicited for the support of the new Vice-Chancellor, Prof. Musbau Adewumi Akanji *FNSBMB* towards tackling the security challenges of the area for the safety of students and the host community of Bosso.

The group made this known during a courtesy visit on the Vice-Chancellor at the Council Chamber, Main Campus, Gidan Kwano on Wednesday, February 7, 2013.

In his address, Chairman of PCRC, Alhaji. Alhassan Wassagi who congratulated the Vice-Chancellor on his well deserved appointment said the group is faced with plethora of challenges in assisting the Bosso Police station to safeguard the community and students from hoodlums. He solicited for the VC's support.

“We hope the relationship and financial assistance would continue to help us surmount our challenges”, he stated.

In his remarks, Prof. Akanji thanked the group for the visit and said FUT, Minna benefiting greatly from the committee's activities in view of its large presence in the community and pledged the University support within its limited resources and to increase its presence in the community.

He also seized the opportunity to debunk the false claim that Godwin Idoko who is standing trial in court for alleged killing of a girl in Rafin Yashi is a student of the University.

In her closing remarks, Registrar, Mrs. Victoria Kolo thanked the group for their support to the University and assured them that the Management would look into issues raised.

CALL FOR PAPERS

The Journal of Disaster Risk Management (JDRM) is an international journal published bi-annually by the **Centre for Disaster Risk Management and Development Studies (CDRMDS), Federal University of Technology, Minna, Nigeria.** The Journal is focused on contemporary global issues of Disaster Risk Management (DRM) and Disaster Risk Reduction (DRR). The objectives are to promote research and development in DRM and DRR, provide a medium for the dissemination of research outcomes, facilitate sharing of experience on disaster management strategies and 'Best Practices', all with a view to reducing the impact of natural and technological disaster as well as building community resilience

and promoting sustainable development. The journal therefore provides an information base for the academic community, professionals, policy makers, government officials and practitioners in the field of disaster management.

Papers for Publication in the Journal

The Journal is a multidisciplinary one. It accepts well researched empirical papers, including case studies, from the following disciplines:

- Earth and Environmental Sciences
- Geography and Urban Studies
- Environmental Engineering and Technology
- Agricultural Sciences and Technology
- Environmental Health
- The Social Sciences
- Economic and Financial Management

Papers to be considered for publication in these areas should address DRM and DRR issues with considerable contribution to knowledge and practical solutions in the field of disaster management. The paper will be peer reviewed by three different assessors and positive result is required from at least two of the assessors
