DEDICATION

I dedicate this work to my many undergraduate and postgraduate students, and numerous professional colleagues in Quantity Surveying, Project Management and other project-based professions who had long desired me to document this exciting field in a book having enjoyed my several interactions with them on the subject.

ACKNOWLEDGMENTS

The author wishes to acknowledge the inspiring role of many pioneer Writers, Scholars and Researchers in the exciting and fast emerging field of Project Risk Management. Their works provided the necessary pedestal for my motivation to take on this responsibility in our tropical environment.
